

KINAX WT717

Programmable transmitter for angular position

For industrial applications in rough environments

KINAX WT717 is a robust, programmable angular position transmitter, which is particularly suited to applications in rough environments due to its unique capacitive measuring principle. It acquires the angular position of a shaft in a non-contact manner and converts it into an impressed direct current proportional to the measured value.

Your customer benefit

LOW LIFE-CYCLE COSTS DUE TO:

TESTED TOP QUALITY

- Capacitive Measuring principle
- Explosion protection acc. ATEX and IECEx intrinsic safety "ia" (gas)

SAFE, FREE OF MAINTENANCE

- 4...20mA analog output signal with 2-wire connection
- Resistant to high mechanical stress due to its robust design and high-quality materials
- High immunity against magnetic fields

EASY AND FAST COMMISSIONING

- No wear, low annual maintenance
- Measuring range, sense of rotation, characteristic and switch point can be parameterised via programming software
- Measured value simulation already during installation is possible

Technical data

General

Measured quantity: Angle of rotation
 Measuring principle: Capacitive method

Measuring input

Angle measuring range: 0...≥ 5 to 0... ≤ 350°(without gear)
 0...1600 turns (with gear)
 Drive shaft diameter: Ø 19 mm [0.748"], Ø 12 mm [0.472"]
 Starting torque: max. 0.25 Nm [35.402 in-oz]
 Sense of rotation: clockwise or counter-clockwise

Measuring output

Output variable I_A : Load-independent DC current, proportional to the input angle
 Zero point variation: approx. ± 5 %
 Final value variation: approx. + 5 %
 Current limitation: I_A max. 40 mA
 Standard range: 4...20 mA, wire connection

Power supply:

Standard (Non-Ex):
 input voltage U_i : 12...33 V
 Explosion protection intrinsic ia:
 input voltage U_i : 12 ... 30 VDC
 max. input current I_i : 160 mA
 max. input power P_i : 1 W
 max. internal capacitance C_i : 6.6 nF
 max. internal inductance L_i : is negligible

Residual ripple in output current:

0.3 % p.p.

Response time:

< 5 ms

External resistance: (load)

$$R_{\text{ext max.}} [\text{k}\Omega] = \frac{H [\text{V}] - 12 \text{ V}}{I_A [\text{mA}]}$$

H = Power supply
 I_A = Output signal end value

Accuracy data

Basic accuracy: Adjustments

0.5 % with characteristic linear
 350° version
 measuring range > 50...350°
 characteristic linear
 50° version
 measuring range ≥ 10...50°
 characteristic linear

KINAX WT717

Programmable transmitter for angular position

Additional errors (cumulative):

Characteristic	Definition	Additional error
Linear 	Programmed Angle max. = MW Angle min. = 0° $[f_{Add}] = \%$	Device version 350°: $f_{Add} = \left(\frac{0.18^\circ}{MW} \times 100 - 0.05 \right)$ Device version 50°: $f_{Add} = \left(\frac{0.05^\circ}{MW} \times 100 - 0.05 \right)$ ex. with MW=180°: $f = f_{Add} + f_{Abs} = 0.05\% + 0.5\% = 0.55\%$
simple "V" characteristic 	Programmed Angle max. = MW Angle min. = 0° $[f_{Add}] = \%$	Device version 350°: $f_{Add} = \left(\frac{0.18^\circ}{MW} \times 100 \right)$ Device version 50°: $f_{Add} = \left(\frac{0.05^\circ}{MW} \times 100 \right)$
"V" characteristic with offset 	$MS = (\text{angle max.}) - (\text{angle min.})$ Angle max. = ± final angle Angle min. = > 0° $[f_{Add}] = \%$	Device version 350°: $f_{Add} = \left(\frac{0.25^\circ}{MS} \times 100 \right)$ Device version 50°: $f_{Add} = \left(\frac{0.09^\circ}{MS} \times 100 \right)$
any characteristic 	$MS = (\text{angle max.}) - (\text{angle min.})$ $[f_{Add}] = \%$	Device version 350°: $f_{Add} = \left(\frac{0.25^\circ}{MS} \times 100 \right)$ Device version 50°: $f_{Add} = \left(\frac{0.09^\circ}{MS} \times 100 \right)$

Reproducibility: < 0.2 %
 Influence of temperature
 output current
 (-40...+70 °C):
 [-40 ... +158 °F] ± 0.2 % / 10 K

Installation data

Housing: Steel (finish QPQ) standard
 High-grade steel 1.4462 sea-water
 Rear (cover): Aluminium (Silafont)
 Mounting position: Any
 Connections: Screwed cable gland metal

There are 2 screw terminals and the programming connection in the rear cover. The screw terminals accept gauges up to 1,5 mm² and are accessible after removing the cover.

Permissible static load on the shaft:

Max. 1000 N (radial)
 Max. 500 N (axial)
 If subjected to vibration the shaft load should be as low as possible to ensure optimum life of the bearing

Bearing play influence
 Weight:

± 0.1 %
 Approx. 2.9 kg (without additional gear)
 Approx 3.9 kg (with additional gear)
 every 0.5 kg for foot or flange

Regulations

Spurious radiation: EN 61000-6-3
 Immunity: EN 61000-6-2
 Test voltage: 750 V DC, 50 Hz, 1 min.
 All connections against housing
 Admissible common-mode voltage: 100 V AC, 50 Hz
 Impulse voltage withstand: 1 kV, 1.2/50 µs, 0.5 Ws, CAT II
 Housing protection: IP 66 acc. to EN 60 529

Environmental conditions

Climatic rating: Standard (NEx):
 Temperature -25 ... +70 °C
 [-13 ... +158 °F]
 Rel. humidity ≤ 90 % non-condensing
Version with improved climatic rating
 Temperature -40 to +70 °C
 [-40...158 °F]
 Annual mean relative humidity ≤ 95 %

Ex version

Max. performance	Temperature class		
	Pi	T6	T4
1000 mW	40 °C [104 °F]	55 °C [131 °F]	75 °C [167 °F]
900 mW	44 °C [111 °F]	59 °C [138.2 °F]	75 °C [167 °F]
800 mW	49 °C [120.2 °F]	64 °C [147.2 °F]	75 °C [167 °F]
700 mW	54 °C [129.2 °F]	69 °C [156.2 °F]	75 °C [167 °F]
660 mW	56 °C [132.8 °F]	71 °C [159.8 °F]	75 °C [167 °F]

Permissible vibration:
 (without addit. gear):

0...200 Hz,
 10 g continuous, 15 g for 2 h
 200...500 Hz,
 5 g continuous, 10 g for 2 h
 3 × 50 g every 10 impulses
 in all axes

Shock:

Transportation and storage temperature:

-40 ... +80 °C [-40° ... +176 °F]

Fig 5. KINAX WT717 with additional gear and foot.

Fig 6. KINAX WT717 with additional gear and flange.

Montage

The six versions of the transmitter differ in their mechanical design. Two of them are intended for mounting directly on the device being measured. The others are equipped with a mounting bracket or a flange. Three M6 screws are needed for the “directly” mounted versions and four M8 nuts and bolts for these “with a bracket” or “with a flange”. The screws, respectively nuts and bolts are not supplied, because the required length varies according to the thickness of the mounting surface.

The relationship between the three types of mounting, or more precisely the corresponding cut-out diagrams and the different versions of the transmitter can be seen from table on page 4.

Electrical connections

Programming

A PC, the programming cable PK 610 plus ancillary cable and the configuration software 2W2 are required to program the transmitter. (Details of the programming cable and the software are to be found in the separate data sheet: PK 610 Le).

Fig. 7. Example of the set-up for programming a KINAX WT 717 without the power supply. For the case the switch on the interface must be set to "ON".
