

KINAX WT717

Programmable transmitter for angular position

For industrial applications in rough environments

KINAX WT717 is a robust, programmable angular position transmitter, which is particularly suited to applications in rough environments due to its unique capacitive measuring principle. It acquires the angular position of a shaft in a non-contact manner and converts it into an impressed direct current proportional to the measured value.

Your customer benefit

LOW LIFE-CYCLE COSTS DUE TO:

TESTED TOP QUALITY

- Capacitive Measuring principle
- Explosion protection acc. ATEX and IECEx intrinsic safety "ia" (gas)

SAFE, FREE OF MAINTENANCE

- 4...20mA analog output signal with 2-wire connection
- Resistant to high mechanical stress due to its robust design and high-quality materials
- High immunity against magnetic fields

EASY AND FAST COMMISSIONING

- No wear, low annual maintenance
- Measuring range, sense of rotation, characteristic and switch point can be parameterised via programming software
- Measured value simulation already during installation is possible

Technical data

General

Measured quantity: Angle of rotation
Measuring principle: Capacitive method

Measuring input

Angle measuring range: 0...≥ 5 to 0...≤ 350°(without gear)
0...1600 turns (with gear)
Drive shaft diameter: Ø 19 mm [0.748"], Ø 12 mm [0.472"]
Starting torque: max. 0.25 Nm [35.402 in-oz]
Sense of rotation: clockwise or counter-clockwise

Measuring output

Output variable I_A : Load-independent DC current, proportional to the input angle
Zero point variation: appox. ± 5 %
Final value variation: approx. + 5 %
Current limitation: I_A max. 40 mA
Standard range: 4...20 mA, wire connection

Power supply:

Standard (Non-Ex):
input voltage U_i : 12...33 V

Explosion protection intrinsic ia:

input voltage U_i : 12 ... 30 VDC
max. input current I_i : 160 mA
max. input power P_i : 1 W
max. internal capacitance C_i : 6.6 nF
max. internal inductance L_i : is negligible

Residual ripple in output current:
Response time:

External resistance: (load)

0.3 % p.p.

< 5 ms

$$R_{ext\ max.} [\text{k}\Omega] = \frac{H [\text{V}] - 12 \text{ V}}{I_A [\text{mA}]}$$

H = Power supply

I_A = Output signal end value

Accuracy data

Basic accuracy:
Adjustments

0.5 % with characteristic linear
350° version
measuring range > 50...350°
characteristic linear
50° version
measuring range ≥ 10...50°
characteristic linear

KINAX WT717

Programmable transmitter for angular position

Additional errors (cumulative):

Characteristic	Definition	Additional error
Linear	 Programmed Angle max. = MW Angle min. = 0° $[f_{Add}] = \%$	Device version 350°: $f_{Add} = \left(\frac{0.18^\circ}{MW} \times 100 - 0.05 \right)$ Device version 50°: $f_{Add} = \left(\frac{0.05^\circ}{MW} \times 100 - 0.05 \right)$ ex. with MW=180°: $f = f_{Add} + f_{Abs} = 0.05\% + 0.5\% = 0.55\%$
simple "V" characteristic	 Programmed Angle max. = MW Angle min. = 0° $[f_{Add}] = \%$	Device version 350°: $f_{Add} = \left(\frac{0.18^\circ}{MW} \times 100 \right)$ Device version 50°: $f_{Add} = \left(\frac{0.05^\circ}{MW} \times 100 \right)$
"V" characteristic with offset	 MS = (angle max.) - (angle min.) Angle max. = ± final angle Angle min. = > 0° $[f_{Add}] = \%$	Device version 350°: $f_{Add} = \left(\frac{0.25^\circ}{MS} \times 100 \right)$ Device version 50°: $f_{Add} = \left(\frac{0.09^\circ}{MS} \times 100 \right)$
any characteristic	 MS = (angle max.) - (angle min.) $[f_{Add}] = \%$	Device version 350°: $f_{Add} = \left(\frac{0.25^\circ}{MS} \times 100 \right)$ Device version 50°: $f_{Add} = \left(\frac{0.09^\circ}{MS} \times 100 \right)$

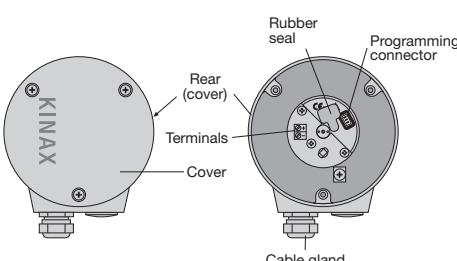

Reproducibility: < 0.2 %

Influence of temperature output current (-40...+70 °C):
[-40 ... +158 °F]

± 0.2 % / 10 K

Installation data

Housing:	Steel (finish QPQ) standard High-grade steel 1.4462 sea-water
Rear (cover):	Aluminium (Silafont)
Mounting position:	Any
Connections:	Screwed cable gland metal
There are 2 screw terminals and the programming connection in the rear cover. The screw terminals accept gauges up to 1,5 mm² and are accessible after removing the cover.	

Permissible static load on the shaft:

Max. 1000 N (radial)

Max. 500 N (axial)

If subjected to vibration the shaft load should be as low as possible to ensure optimum life of the bearing

± 0.1 %

Approx. 2.9 kg (without additional gear)

Approx 3.9 kg (with additional gear)

every 0.5 kg for foot or flange

Regulations

Spurious radiation:	EN 61000-6-3
Immunity:	EN 61000-6-2
Test voltage:	750 V DC, 50 Hz, 1 min. All connections against housing
Admissible common-mode voltage:	100 V AC, 50 Hz
Impulse voltage withstand:	1 kV, 1.2/50 µs, 0.5 Ws, CAT II
Housing protection:	IP 66 acc. to EN 60 529

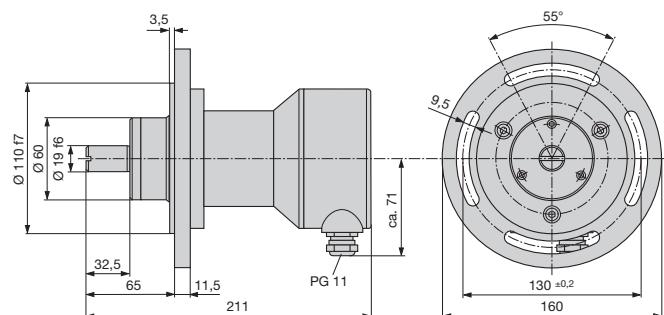

Fig 6. KINAX WT717 with additional gear and flange.

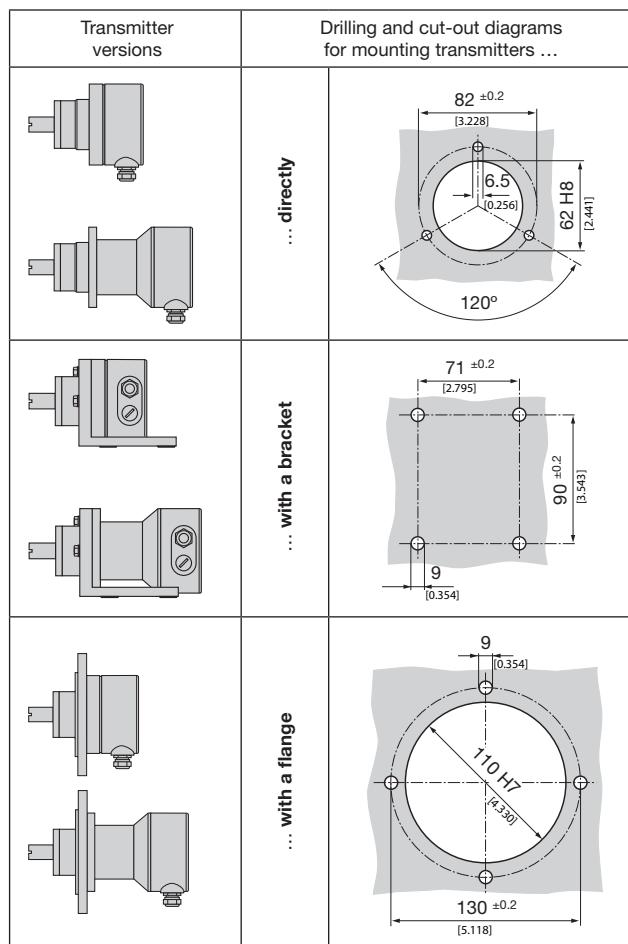

Montage

The six versions of the transmitter differ in their mechanical design. Two of them are intended for mounting directly on the device being measured. The others are equipped with a mounting bracket or a flange. Three M6 screws are needed for the "directly" mounted versions and four M8 nuts and bolts for these "with a bracket" or "with a flange". The screws, respectively nuts and bolts are not supplied, because the required length varies according to the thickness of the mounting surface.

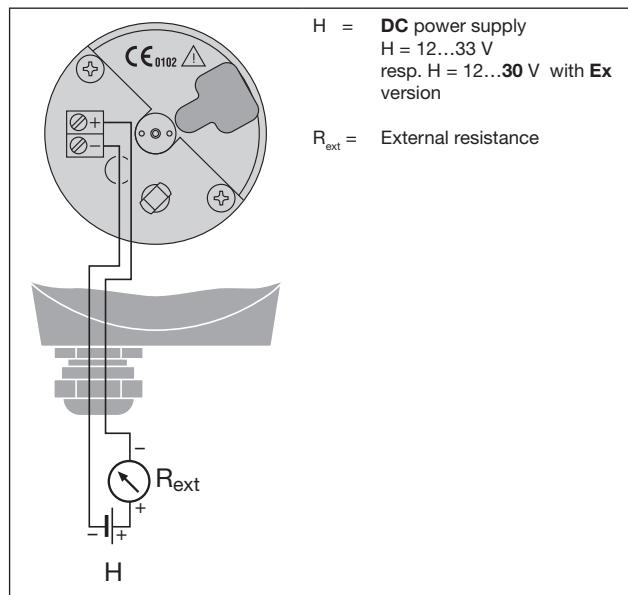

The relationship between the three types of mounting, or more precisely the corresponding cut-out diagrams and the different versions of the transmitter can be seen from table on page 4.

KINAX WT717

Electrical connections

Programming

A PC, the programming cable PK 610 plus ancillary cable and the configuration software 2W2 are required to program the transmitter. (Details of the programming cable and the software are to be found in the separate data sheet: PK 610 Le).

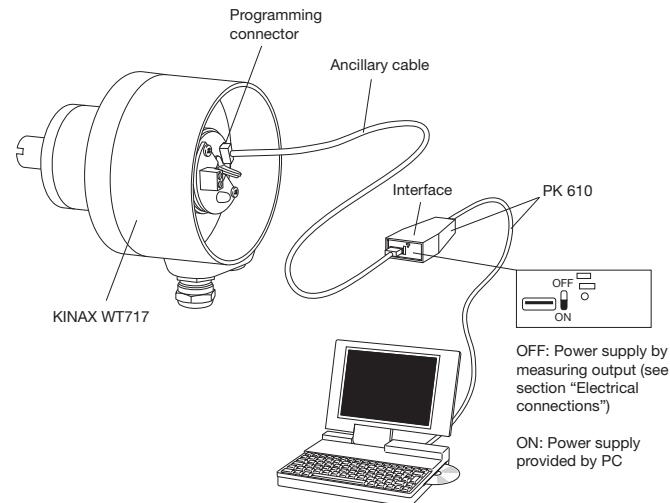

Fig. 7. Example of the set-up for programming a KINAX WT 717 without the power supply. For the case the switch on the interface must be set to "ON".
